

### TOOLS

Screwdriver with square or Phillips head bit

Identify the location of the handle foot pad.

Detach the inner lining of the bag to access the screws.

Unscrew the four screws that secure the foot pad to the bag.  
Hold the foot pad while unscrewing.

Remove the worn foot pad.

Pre-position the first screw in its hole to facilitate alignment with the foot pad's screw insert.

Align the tip of the screw with the first screw insert and screw it in.

Repeat the operation for the second screw located on the opposite side.

Tighten all four screws.  
The assembly of the new foot pad is complete.  
Reposition the inner linings of the bag.
